Rules and Guidelines

- DO NOT change your problem statement & theme. Changing it during the hackathon will lead to disqualification.

- All work on a project must be done in the hackathon duration only.

- Complete the project within the hacking round, any form of plagiarism is strictly forbidden and may result in disqualification.

- The use of libraries, frameworks, and open-source code in projects is allowed. However, prior work on the project or open-sourcing specifically for the purpose of using it during the hackathon is not permitted.

- Every team must establish a public repository on GitHub. Repository naming format: iemhacks_{Team Name}

- In your GitHub repository, you should provide the details of your team with teammates' GitHub username, your problem statement and project installation setup in the README file.

- Once the hackathon commences, we will be sending a Google Forms link every 6 hours. This means that the first link will be available at 4 PM. For every team, filling up the form is mandatory, otherwise you will be losing points hence losing the hackathon.

Rules and Guidelines

- In each form, we will collect your GitHub repository link, and a summary of what you have done so far. Hence by the time you fill the form, you should have your repository updated.

- You will have a 30-minute span to fill up the form. The form will close exactly after 30 minutes and we will not entertain any late requests.

- The final and most crucial form will be available at 10 PM on 27th August. If any team submits the form after the deadline, they will be disqualified.

- There shouldn't be any changes in your GitHub repo after the final submission (i.e. 10 PM on 27th August 2023). Any changes after the final submission will lead to disqualification.

- The final form will collect your GitHub repository link and a video presentation of your project. The video should be 1 minute long at least, and 3 minutes at most. You can upload it in your drive and submit the link to it. (Make sure it is public and visible to anyone with the link).

- Have fun: Finally, remember that the hackathon is meant to be a fun and creative experience, so enjoy the process and embrace the challenge!
